Intermediate (CBSE)

Deep Memorial Public School	2019	**70.2%**

Work Experience

VisionIAS   Aug 2024 – Present

Full Stack Web Developer

- Designed and developed a full-stack Leave Management System using Laravel (backend) and React.js (frontend), implementing role-based access control, leave tracking, and approval workflows.
- Maintained and improved a Laravel-based educational platform that delivers daily newspaper-style content to school students, aimed at enhancing general knowledge. Responsibilities included backend development, performance optimization, debugging, and adding new features based on stakeholder feedback.
- Contributed as a backend developer to a content-driven platform that publishes daily current affairs for IAS aspirants, focusing on efficient data handling, content scheduling, and API development for frontend integration.
- Maintaining and supporting a CodeIgniter-based School Management System for Rajni Devi Global Village School, including feature enhancements, issue resolution, and database optimization to ensure smooth day-to-day school operations.

Framework used

- LARAVEL
- REACT JS
- HONO JS
- FLASK
- ZOLA
- NODE JS

CI/CD

- Github Actions
- Jenkins

Thinkbar　　　　　　Feb 2024 – Jul 2024
Full Stack Web Developer

- Developed a full-stack chemical e-commerce website using Laravel, implementing product management, secure payment integration, user roles, and order processing workflows.
- Stabilized and optimized the backend of a hospital management system, supporting web and mobile applications for nurses, doctors, and patients. Focused on resolving critical bugs, improving API performance, and ensuring data consistency across services.
- Worked as a backend developer on an interactive storytelling platform that empowers children to create and share stories based on their real-world actions and choices, integrating dynamic content generation and user-friendly interfaces.

VoiceDigit　　　　　　Nov 2023 – Jan 2024
Full Stack Web Developer

- Developed a Laravel-based CMS platform designed to enhance employer-employee relationships by streamlining communication, feedback, and performance tracking within a unified system.

Pheuture Studio Pvt. Ltd.　　Oct 2022 – Nov 2023
Full Stack Web Developer

- Developed a Laravel-based LinkedIn automation tool, enabling users to streamline connection requests, messaging, and engagement workflows while complying with platform limitations.
- Built a Laravel application integrating YouTube and YouTube Analytics APIs, providing users with content performance insights, subscriber trends, and video management features.
- Created a customizable chatbot platform using Laravel, allowing users to define workflows and responses tailored to their specific business or support requirements.
